SINEAX V 608, Programmable Two-wire Temperature Transmitter for RTD and TC Inputs

for rail mounting in housing K17

CE 0102 Ex II 2 (1) G

Application

SINEAX V 608is a two-wire transmitter. It is designed for **measuring temperature in combination with thermocouples or resistance thermometers**. Thermocouple non-linearities are automatically compensated. The output signal is a current in the range 4…20 mA.

The input variable and measuring range are programmed with the aid of a PC and the corresponding software.

The sensor circuit is monitored for open and short-circuits and the output responds in a defined manner if one is detected.

The power supply (12…30 V DC) is connected together with the signal by the two leads connected to the measurement output (loop powered).

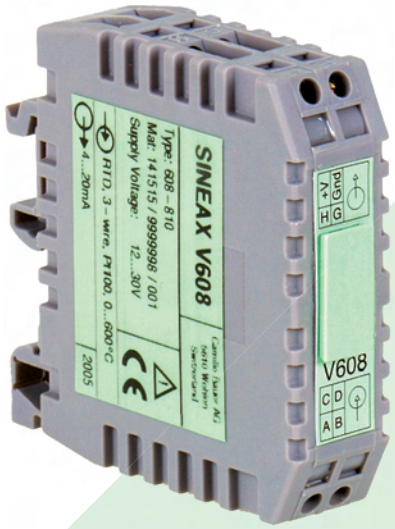

Fig. 1. Measuring transmitter SINEAX V 608 in housing K17.

Features / Benefits

- **Input variable and measuring range programmed using PC / Simplifies project planning and engineering, short delivery times, low stocking levels**

Measured variables	Measuring ranges		
	Limits	Min. span	Max. span
Temperatures with resistance thermometers for **two, three** or **four** wire connection			
Pt100, IEC 60 751	– 200 to 850 °C	50 K	850 K
Ni100, DIN 43 760	– 60 to 250 °C	50 K	250 K
Temperatures with thermocouples Type B, E, J, K, N, R, S, T acc. to IEC 60 584-1 Type L and U, DIN 43 710 Type W5 Re/W26 Re Type W3 Re/W25 Re acc. to ASTM E 988-90	acc. to type	2 mV	80 mV

- **Two-wire transmitter for installation in the process environment**
- **Open and short-circuit sensor circuit supervision / Defined output response should the supervision pick-up**
- **Programmable with or without power supply connection**
- **Compact design / Makes maximum use of available space**
- **Available in type of protection "Intrinsic safety" EEx ia IIC T6** (see "Table 5: Data on explosion protection")

Standard versions

The following versions are available as standard versions already programmed for the **basic** configuration. It is only necessary to quote the **Order No.:**

Table 1:

Version	Cold junction compensation	Order Code	Order No.
Standard, not electrically isolated	incorporated	608-810	141 515
EEx ia IIC T6, not electrically isolated		608-830	141 523

Please complete the Order Code 608-8.1. .... according to "Table 3: Specification and ordering information" for versions with user-specific input ranges.

Basic configuration:

Measuring input	Pt 100 for **three-**wire connection
Measuring range	0 … 600 °C
Measuring output	4 … 20 mA, linearised with temperature
Open-circuit supervision	Output 21.6 mA
Response time	Approx. 1.5/2 s (Table 2)
Mains ripple suppression	For frequency 50 Hz

Programming

A PC, the programming cable PK 610 plus ancillary cable and the programming software V 600 *plus* are required to program the transmitter. (Details of the programming cable and the software are in be found in the separate data sheet: PK 610 Le.)

The connections between
"PC ↔ PK 610 ↔ SINEAX V 608" can be seen from Fig. 2. The transmitter can be programmed either with or without the power supply connected.

The software V 600 *plus* is supplied on one CD and runs under Windows 3.1x, 95, 98, NT and 2000.

The programming cable PK 610 adjusts the signal level between the PC and the transmitter SINEAX V 608.

The programming cable PK 610 is used for programming both standard and Ex versions.

It is possible to programme the temperature transmitter installed into the hazardous area.

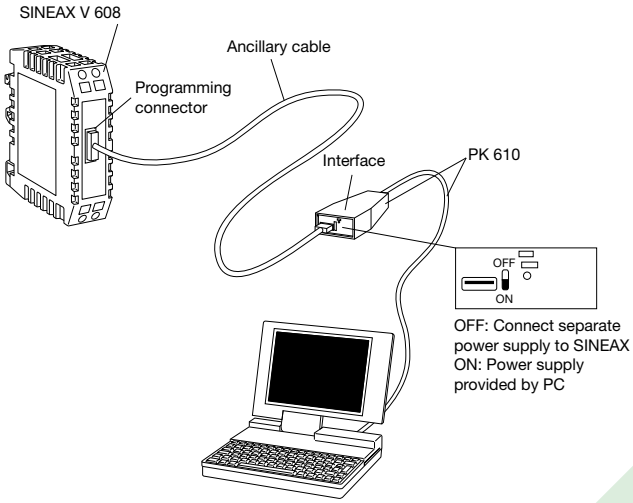

Fig. 2. Example of the set-up for programming a SINEAX V 608 without the power supply. For this case the switch on the interface must be set to "ON".
